

## After My Covid 19 Test

If I get a **positive test result** I will need to isolate for 10 days at home, including anyone else in my household. I will have to do this even if I don't have any Covid symptoms. Then I will be safe to return to school if I need to.

If I get a **negative test result**, it is still **very important** to remember the rules to keep everyone as safe as possible.

### The Covid rules for staying safe include...

- Keeping a safe distance from people (1-2 meters)

- Wash or gel my hands frequently

- After using the toilet
- Entering and leaving a building
- Touching a number of surfaces
- Before and after eating
- Coughing or sneezing
- Touching my face

This will help to keep everyone in school and at home safe 😊
