

## Having a covid 19 Test in School

When I go to school I **might** have a Covid Test if I agree to it. This will help to keep everyone safe.

This is a simple process.

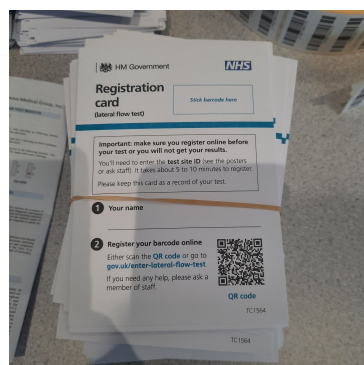

It will take place in the School's 'Immersive Space'.

This will happen in 3 simple steps, following the arrows. My Teachers will help me and tell me what to do when I get tested.

**At desk 1:** My name will be written down on a card with my own number (barcode) on so my Teacher's know it's my test.

**At desk 2:** It will probably be Mrs Black who will tell me how to use a swab stick to test myself.

First I will be asked to open my mouth and swab the back of my throat. Use the swab to rub firmly 4 times on each side. I can look in a mirror to see what I'm doing. Here is Mr Fay having a test...

Next I will be asked to gently put the swab about 2-3 cm inside each nostril and roll it round 4-5 times. Mrs Black will tell me where to put the stick in a small tube so it can be tested.

Now I'm all done and I can go back to class

**At desk 3:** Mrs Elston or another Teacher, will take it from here and test the sample. If it is positive she or another member of staff will let me know.

**This will be helping to keep everyone safe**
