

Prepayment meter fuel support vouchers

Sefton Council is reminding households across the Borough who have prepayment meters to ensure they use vouchers sent through the Government's Energy Bill Support Scheme.

Vouchers worth £66 were sent out by SMS text, email or post to prepayment meter customers from the start of October, as the first instalment of the Support Scheme.

For most suppliers the vouchers, which can be redeemed at a Post Office or other locations such as PayPoint shops, should arrive in the post by 17th of each month but they are only valid for 90 days.

Payments of £67 in December, January, February and March will follow the £66 payments for October and November. Households with smart prepayment metres will be credited directly in the first week of each month.
